2016 – 362 Poster Project

The posters should be prepared with advance advice from Mr. Ghosh or Ms. Yang. Each group will present on the designated day, and the groups that do not present will be the evaluators. The group presentation will involve a 6 - 7 minute presentation of the poster, involving each member of the group. Evaluators will be members of the class who are not presenting as well as MYD, PG, XY, and other inorganic chemists. All will be given report sheets with guidelines as found below. Each poster/presentation should be evaluated 4 or 5 times.

Note: We will have easels for the posters. If you prefer to just print out your poster in 8x11 sheets, that is fine. Examples of posters and templates are on the website.

CHEM 362 – Inorganic Chemistry Poster Project

Spring 2016

Points Scale: 5 (Excellent); 4 (Very Good); 3 (Good); 2 (Fair); 1 (what???)

Group#: __________

Presenters’ Names: ____________________________

Presentation: ________________________________

Points: __________ Evaluation/Comments: __________________________

___ Clarity/Organization

___ Knowledge and Understanding of System

___ Chemical Principles Explained

___ Breadth/Scope/Significance

___ Helpfulness of Graphics

___ Appropriateness of References
