SECTION 552 - 561 (same as your lab section)

1. Read each question carefully before answering.

2. Mark the choice that best answers the question or completes the statement.

3. Use the scantron provided. Use a no. 2 pencil and clearly mark your choice. If you change an answer, completely erase your previous mark.

4. Answer each question. There is no penalty for guessing. However, multiple answers are graded as incorrect, and blank answers are graded as incorrect.

5. On the scantron, fill in your last name, first name and initial. Blacken the corresponding letters.

6. Fill in your ID, the department=CHEM, Course no. = 101, and Section= your lab section. Blacken the corresponding letters and numbers.

7. Use the test for scratch paper.

8. Mark your answers on the test so you can check them with the key when it is posted.

9. ***Turning in a blank scantron results in a grade of zero. ***

10. You may be asked to turn in both the scantron and the exam, have your PHOTO ID and your calculator ready to be checked when you do so.

11. Work at a steady pace and you will have ample time to finish.

12. The keys will be posted on my class web page as soon as possible. You may check your grade at the class web site. Your password is the middle 5 numbers of your student ID followed by the first letter of your last name in CAPS. Be patient and give the webmaster time to enter all of this information.

There are 30 questions for 150 points. Good Luck!
